hanimo MASTER OVERVIEW — 2026-04

hanimo : 2026-04-11 : reference-tools-survey / enhancement-plan / sync-tracker / Claude Code (v0.2.x ·Plan·Deep Agent·Certified Model ·)

---

0. TL;DR (30 □ □□)

- **hanimo** = Go + Bubble Tea , AI . **v0.2.x**.
- **3** 가: ① hash-anchored edit(hashline_*), ② 14+ provider , ③ + clarify-first.
- **3** 가: ① Repo-map , ② Skill/Hooks , ③ Subagent(context fork) .
- : " (14+ provider)" → "**Certified Model System** (Tier 1/2/3, 10~12)" .
- **TECHAI_CODE**: hanimo 가 upstream, TECHAI_CODE downstream + playground. Plan read-only → .
- : ①Plan read-only (TECHAI) ②hashline ③ clarify-first/prompt embed ④doom-loop detector ⑤Repo-map PoC.

---

2. □□ □□ □□ (v0.2.x as-is)

2.1 Core — ⍰ □□ □□ □

Provider (14+: ollama, openai, anthropic, google, openai-compat, novita, openrouter,	internal/llm/providers/

deepseek, groq, together, fireworks, mistral, vllm, lm studio, custom)		
Hash-anchored edit (hashline_read/hashline_edit)		internal/tools/hashline.go
MCP stdio + SSE transport		internal/mcp/
3-stage compaction (snip → micro → LLM summary)		internal/llm/compaction.go
Session SQLite (save/load/fork/search)		internal/session/
Knowledge store (extractor + injector)		internal/knowledge/ (Hermes memory)
Agents (Super/Plan/Auto/Intent/AskUser)		internal/agents/
Command palette Ctrl+K		internal/ui/palette.go
i18n (ko/en), 5 themes		internal/ui/
Deep Agent 100-iter loop		ModeDev
+ clarify-first directive		agents/intent.go, prompt.go
ASK_USER		agents/askuser.go
Tool loop detection ( )	v0.2.1	
Dangerous regex		internal/tools/shell.go

2.2 v0.2.1 □□ □□ □□

- clarifyFirstDirective — .
- .
- list_files skip .
- Shell env .
- tool call loop .
- Plan read-only (hanimo) .

2.3 □□ □□ □ (□ □□□□)

Context	Repo-map (tree-sitter+PageRank)	
Context	Skill (SKILL.md)	
Agent	Subagent (context fork)	, ·
Agent	Doom loop detector ( )	X
Agent	Git Worktree	
Safety	Permission 5-mode + rule	/
Safety	Credential scrubbing (output)	
Safety	Sandbox (seatbelt/unshare)	OS
Ext	Hooks (8~25 events)	X
Ext	apply_patch (unified diff)	hunk
Ext	LSP (gopls)	
UX	Session Browser UI + --resume <id>	
UX	JSON headless	CI/CD
UX	DECSET 2026 synchronized output	
Cost	Prompt caching (Anthropic cache_control / OpenAI prompt_cache_key)	90%

3. □□□ □□□ — □□ □ 10 가 □□□□

: docs/research/reference-tools-survey-2026-04.md

		hanimo 가
Aider	Repo-map (tree-sitter + PageRank,)	internal/repomap/ — A1
Claude Code	SKILL.md + lazy load	internal/skills/ — A2
Claude Code	Hooks (8~25 events)	internal/hooks/ — A3
Claude Code / Crush	5-mode permission + rules	internal/permission/ — A4
Claude Code	Subagent (context fork) +	internal/agents/subagent.go — B1
Codex CLI	apply_patch unified-diff + AST	internal/tools/applypatch.go — B4

Hermes	learned skill	skills/extractor.go
Crush / Continue	LSP (gopls/tsserver/pyright)	internal/lsp/ — C3
opencode / Gemini CLI	JSON headless mode	--output json — C5
Claude Code	Prompt caching (ephemeral cache_control)	llm/cache.go — C2

3.1 □□/ToS □□ (□□□ □□)

- **Claude Pro/Max OAuth** : 2026-04-04 , .
- **Codex CLI / Gemini CLI** : ToS .
- API (Anthropic/OpenAI/Google), OpenRouter/Novita/DeepSeek/Groq .
- (Ollama, LM Studio, vLLM) .

---

4. □□ □□ — Certified Model System

"14+ provider " ≠ "14+ provider ". .

4.1 Tier □□

Tier

Tier 1 — Certified		Claude Sonnet 4.x, GPT-5( ), Gemini 2.5 Pro, qwen3-coder-30b, gpt-oss-120b	/ doom-loop /
Tier 2 — Supported	, feature	Groq llama-3.3-70b, DeepSeek V3, Mistral Large, Gemma 4 31B	+
Tier 3 — Experimental	--experimental	Novita , endpoint, <7B	No SLA,

4.2 □ □□□ □□□ □□

- **eval** (Intent / Plan / Edit / Shell / Compaction).
- Tier 1 **system prompt** (negative-example, tool description override).
- Novita 429 **Tier 2/3** → Tier 1 .
- hanimo models Tier .

4.3 3-Layer Defense Architecture

1. **Pre-send**: dangerous regex , credential scrubbing, tool call loop hash.
2. **Post-receive**: secret leak , over-long tool args , JSON retry-or-ask.
3. **Loop**: doom-loop detector (3 tool hash → abort), iteration cap env.

---

5. 3 □□ □□□ (enhancement-plan-2026-04 □□)

Phase A — Foundation Upgrade (2~3 □)

A1	Repo-map (tree-sitter + PageRank + SQLite cache)	internal/repomap/ — cold <300ms / warm <80ms (10K files)
A2	Skill (SKILL.md lazy load, $ARGUMENTS, inline ! shell, learned skills)	internal/skills/
A3	Hooks (8 events: SessionStart/End, Pre/PostToolUse, PermissionRequest, PostCompact, TaskComplete, PostToolUseFailure)	internal/hooks/ + .hanimo/hooks.yaml
A4	Permission 5-mode + rule + yaml append	internal/permission/ + Shift+Tab

Phase B — Agent Orchestration (2~3 □)

B1	
B2	
B3	
B4	

Phase C — Polish & Scale (2 □)

C1	
C2	
C3	
C4	
C5	

Phase A □□ □□

- 10K cold start ≤ 300ms, warm ≤ 80ms.
- skill 5 : review-pr, write-tests, refactor, deploy, debug.
- hook 3 : gofmt-on-save, block-dangerous, summarize-on-compact.
- Permission 1 (yaml auto-append).
- hashline_edit + apply_patch .

- doom-loop detector 가 1 .

---

6. Immediate Wins — □□ □□ (□ <1h)

1. **System prompt** : prompts/{core,super,dev,plan}.md , //go:embed.
2. **Tool description negative example**: file_edit: DO NOT use for new files, shell_exec: DO NOT use for search, hashline_edit: "3#e4d9" .
3. **Doom loop detector**: 3 iteration tool hash abort.
4. **Dangerous regex** : export\s+(AWS|OPENAI|ANTHROPIC|GITHUB)_.*KEY, curl -H 'Authorization, dd if= of=/dev/, fork bomb.
5. **.hanimo.md** 2 .
6. **Read-before-write** : local set, .

---

7. TECHAI_CODE □□ □□ (sync-tracker □□)

7.1 □□□

- : hanimo → TECHAI_CODE (catch-up).
- **PoC**: Skills / Repo-map / Hooks / apply_patch TECHAI_CODE → hanimo .

7.2 Sync □□ □□□□□
